Fermena

Item Code: 3000 Suggested Retail: \$110.00

Over 50 fruits and vegetables fermented over 6 months

Powerful prebiotic that activates the growth of beneficial flora and enzymes.

Take Fermena alone or with food 2-3 times a day.

Fermena comes from a secluded 30,000 acre ranch hundreds of miles away from urban/industrial areas with its own very pure 2-mile deep spring water source.

60 tubes per box.

Dr. Michio Kushi

Formulated by the “Father of Macrobiotics,” Dr. Michio Kushi carefully evaluated and selected the ingredients for Fermena based on the macrobiotic theory and the Yin-Yang philosophy. Dr. Kushi discovered that by adding Fermena to our normal diet, one can get some of the same benefits of macrobiotics without adopting a complete macrobiotic lifestyle. In recognition for his role in launching the modern health and diet revolution, the Smithsonian Institute opened a permanent Kushi Family Collection on Macrobiotics.

Anti-Oxidative Effect

At the Korin Clinic in Japan, Dr. Yasunari Kageyama performed a one-month trial of 100 people taking 7g of Fermena per day. The anti-oxidative strength levels of the group were measured in the blood of the participants with the following results: 87% of the participants had an increase of anti-oxidative strength with average increase of 38%.*

Fermented Plant Prebiotic Supplement

Fermena is a potent Prebiotic* supplement designed by the master of Macrobiotic health, Dr. Michio Kushi. Fermena undergoes a 6-month fermentation process utilizing over 50 naturally grown plants raised hundreds of miles away from urban/industrial areas, using very pure 2-mile deep spring water, at a secluded 30,000 acre ranch in Brazil. The fermentation process produces Lactic, Acetic, Citric Acids and various kinds of Oligosaccharides and nutrients that powerfully activate the growth of friendly and essential flora in your intestines.* What are the health benefits of having these friendly micro-organisms in the colon? Fermena, as a Prebiotic*, helps promote digestion by maintaining sound activities of intestinal flora, increasing their strength and numbers.* This activity also helps facilitate the absorption of calcium, and maintain healthy bone density.* It helps suppress the activity of undesirable enzymes in the large bowel, and it has a significant effect to help maintain cholesterol levels that are already in the normal range.

*These statements have not been evaluated by the food and drug administration. This product is not intended to diagnose, treat, cure or prevent any disease.
