## Gratitude

Item Code: 1100    Suggested Retail: \$95.00

Active hydrogen water maker.

Reduces oxidation, creating anti-oxidant water that chases down harmful free radicals.

Drinking water, cooking, coffee and tea, pets, plants.

### Cartridge Properties:

Mineral rocks to release Calcium

Zeolite ball to remove heavy metals

Magnetized ball to increase reduction power

Magnesium alloy to generate active Hydrogen

Activated Carbon to assist water alkalization

Dr. Won Kim

Dr. Kim dedicated his life to researching the inherent benefits of water as a result of his daughter's illness and incredible recovery. According to Dr. Kim, "Gratitude from Diamond Tree provides a way to improve water's initial positive memory experience and increase your opportunity for improved health and happiness. Start your day with Gratitude and experience the transformation!" Dr. Kim received his doctorate in Biochemistry from Oxford University and is currently a professor at Yonsei University in Korea.

## Directions

1. Wash the inside of Gratitude. Fill with water, shake about 10 seconds, and drain. Repeat 3 times.
2. Pour filtered drinking water into Gratitude. Do not use tap water.
3. You will notice a bubble forming from the cartridge. This is active Hydrogen which converts the water to an alkaline micro-cluster state.
4. Wait 20 minutes as water completes the conversion.
5. Refill 2-3 times daily as needed to receive 1.5-2 liters of water.
6. Keep the cartridge in the water at all times.
7. Water will last 2-3 days if kept refrigerated in the bottle.
8. Any change in the color or taste of the water is not harmful. Empty, rinse and refill.
9. Wash the cartridge once a week. Pour filtered water into the bottle to cover the cartridge. Drop a small cap of vinegar or citric acid and shake for 10 seconds. Rinse with clean water 2-3 times. Do not use a brush, detergent or hot water.
10. Lifetime of the cartridge is approximately 12 months at 2 liters per day.

## Components and Assembly

1. Push the cartridge downward on base vessel.
2. Assemble the base vessel, body and lid.
